CMenu plugin V1.0

How to use:

(With the following steps, you can easily create a multilingual website.)

Step 1: Create all the pages you want in each language.								
🚯 📸 CMTEST 🔂 1	🏴 0 🕂 New			Howdy, CMTEST 📃				
🖚 Dashboard	ashboard Pages Add New							
📌 Posts	All (8) Published (7) Draft (1)			Search Pages				
9) Media	Bulk actions V Apply All dates V Filter			8 items				
📙 Pages 🗸	C Title	Author		Date

Collapse menu	\mathbf{X}	bi	Bislama	Bislama	D

Step 6: The changes are not yet visible on the finished page.								
CMT	EST						f 💌 🕷	
ENG-01	ENG-02	GER-01	GER-02	ESP-01	ESP-02			

Step 7:

Set the CSS classes in the menu. The 'CMENU' class indicates that the menu item is part of the CMENU display. The language's ISO code determines in which language the menu item should appear.

The trial period is 10 days. The license is automatically added. After the 10 days the CMenu turs off. If you want to use CMenu further on, please go to the 'PRO version' and buy license. It is simple and quick. From the localhost domain it is free to use.

If you have any question please feel free to send us an email: cmenu@digitalkey.eu
